I 長文読解（配点 26点）

以下の英文を読み，後の問いに答えよ。

Ten minutes before the curtain rises, the small theater on Varga Street is unusually quiet. The audience is not silent out of politeness; many of them are deaf, and the lively chatter filling the room is conducted in sign language[1], hands flickering through the dimly lit air. Backstage, Lena Marchetti meticulously checks the angle of a spotlight that will follow the actors' hands rather than their faces. "If people can't see the signing, they can't follow the story," she explains. "Lighting is not decoration here. It is the voice of the play."

Marchetti, forty-eight, is the founder and artistic director of Open Hands Theatre, a company in which deaf and hearing actors perform side by side. Every production is presented simultaneously in spoken language and in sign language, but not in the way most audiences might expect. Instead of placing an interpreter in a corner of the stage, the company builds signing into the performance itself, so that a character's hands carry as much of the drama as a raised voice or a slammed door.

Her path to the theater began at home. Marchetti's parents were both deaf, and sign language was the first language she learned, long before she spoke a word. As the only hearing member of the family, she often found herself acting as an interpreter at the doctor's office, at the bank, and at parent-teacher meetings, even as a small child. "I was translating adult conversations when I was seven," she recalls. "It gave me an uncanny knack for reading people's faces and inflections, but it also made me aware of how often my parents were simply left out."

That awareness stayed with her when she went to university to study drama. She loved the stage, but she noticed that theaters almost never considered deaf audiences, apart from the occasional performance with an interpreter standing in the shadows. Her parents, who enjoyed stories as much as anyone, rarely went to see plays because, as her mother once put it, "watching an interpreter while the actors talk is like reading the subtitles of a film whose pictures you cannot see."

After graduating, Marchetti worked for more than a decade as a professional sign language interpreter, mostly in courts and hospitals. The work was grueling and often emotionally draining, but it taught her something she would later rely on. "In a courtroom, you learn that meaning does not reside solely in the words," she says. "It is in the pauses, in where someone looks, in how fast they move. An interpreter who translates only the words loses half of what is said."

In 2012 she gathered a group of four actors, two deaf and two hearing, in a cramped, borrowed rehearsal room above a bakery. Their first production, an adaptation of a well-known folk tale, ran for just six nights and attracted barely a hundred people in total. Yet the response from those who came was rapturous. Deaf audience members, enthralled, described it as the first time they had laughed at the same moment as the hearing people beside them, and several riveted hearing viewers said they had never paid such close attention to what actors did with their bodies.

Creating that experience demands an unusual way of working. Rehearsals take roughly twice as long as in a conventional company, because every line must be shaped in two languages at once, and the rhythm of a signed sentence rarely matches that of a spoken one. Actors must also learn deft, interlocking positions on stage, arranging themselves so that the signers are never obscured. “A hearing director might place two characters huddled face to face in a dark corner for an intimate scene,” Marchetti says. “For us, that would be the same as turning off the microphones.”

The company has grown steadily. It now employs eleven actors and tours to schools and community centers across the region, and its productions have been invited to festivals in three other countries. Marchetti is particularly proud of a workshop program in which hearing children learn basic signs through drama games. Teachers report that pupils who take part become noticeably more patient listeners, and that some continue to study sign language long after the program ends.

Not everyone has been enthusiastic. Some members of the deaf community initially voiced misgivings that a company led by a hearing director might present deaf culture from the outside. Marchetti took the criticism seriously. Since 2017, at least half of the company’s board has been made up of deaf members, and every script is reviewed by deaf advisers before rehearsals begin. “I grew up inside this community, but I am still a hearing person,” she says. “It would be arrogant, even condescending, to assume I always know best.”

Money remains a constant concern. Ticket prices are kept deliberately low, and the company survives on a shoestring budget of donations and short-term grants that must be applied for every year. Even so, Marchetti has no plans to slow down. She is currently working on a production in which there will be no spoken words at all, only signing, movement, and music whose vibrations the audience can feel through the floorboards. “For once, the hearing audience will be the ones who have to work a little harder,” she says, smiling. “I think that will be good for them.”

1. sign language　手話
2. artistic director　芸術監督
3. simultaneously　同時に
4. adaptation　翻案（作品）
5. rehearsal　稽古・リハーサル
6. board　理事会

7. grant　補助金

〔1〕 次の問い(A)～(D)に対する答えとして最もふさわしいものを，本文の内容に基づいて(1)～(4)のうちから1つずつ選びなさい。

(A) What was Marchetti's childhood like?

(1) She attended a special school for children who could not hear.
(2) She was taught sign language by a professional interpreter.
(3) She performed in plays with her parents at home.
(4) She often interpreted for her deaf parents in everyday situations.

(B) What did Marchetti learn from working in courts and hospitals?

(1) It convinced her that interpreters should never appear on stage.
(2) It taught her that meaning is carried by more than words alone.
(3) It made her decide to study law instead of drama.
(4) It showed her that hospitals needed more deaf doctors.

(C) Why do rehearsals at Open Hands Theatre take longer than usual?

(1) The actors have to memorize scripts written in several foreign languages.
(2) The theater has to be rebuilt for every new production.
(3) Every line has to be prepared in two languages with different rhythms.
(4) Deaf actors need extra time to learn to speak their lines aloud.

(D) How did Marchetti respond to criticism from some members of the deaf community?

(1) She gave deaf people a larger role in decisions about the company.
(2) She stopped performing in front of hearing audiences.
(3) She handed her position as director to a deaf actor.
(4) She decided to perform only traditional folk tales.

〔2〕 次の(1)～(5)の英文について，本文の内容に合うものは 1，合わないものは 2，本文からは合うとも合わないとも決められないものは 3 を選びなさい。

(1) At Open Hands Theatre, an interpreter usually stands in a corner of the stage.

(2) Marchetti's mother rarely went to the theater before Open Hands Theatre was founded.

(3) The company's first production made a large profit.

(4) Some children who join the workshop program go on learning sign language afterward.

(5) Marchetti's next production will use spoken words but no music.

〔3〕 本文全体の内容を表す題として最もふさわしいものを(1)～(5)のうちから1つ選びなさい。

(1) The difficulties of working as an interpreter in courtrooms
(2) Why deaf audiences prefer films to plays
(3) A history of sign language in Europe
(4) How a theater company folds two languages into one performance
(5) Raising money for small theater companies

II 長文読解（配点 34点）

以下の英文を読み，後の問いに答えよ。

On my forty-fourth birthday, I did something that my family regarded as either brave or slightly ridiculous: I rented a cello and signed up for lessons. I had never played an instrument, apart from a few miserable months with a recorder at primary school, and could not read music. [A], I had wanted to play the cello for as long as I could remember, ever since I heard one on the radio as a child and felt, inexplicably, that the sound was somehow speaking directly to me.

My teacher, a patient woman in her sixties who has mostly taught children, warned me at our first meeting that adults are often harder to teach than eight-year-olds. I assumed she meant that our fingers are stiffer and our memories weaker, and I was prepared to accept that. But that was not what she meant at all. “Children expect to be bad at things,” she said. “Adults have forgotten how. (あ)They come to me used to being competent, and they find it very hard to be beginners again.”

She was right, as I discovered within a week: at work I am considered reasonably capable; people seek my opinion, and I usually know what I am doing. On the cello, I knew nothing; my bow slid across the strings and produced a screech that our dog found deeply alarming, and my left hand fumbled for the notes and, when it found them, could not stay on them. I practiced for half an hour every evening and, [B] a month, could play exactly one simple melody, slowly and badly. What I had not expected was how much this would bother me. I was not merely disappointed; I felt mortified, as if I had been caught pretending to be someone I was not.

It took me some time to understand why. As adults, most of us arrange our lives so that we rarely have to do things we are bad at. We choose jobs that suit our strengths, hobbies we already enjoy, and conversations in which we can say something sensible. [C] this is perfectly reasonable, it means that the experience of being a complete beginner gradually disappears from our lives, and with it the habit of tolerating our own clumsiness. (い)When it finally returns, it strikes like a long-forgotten fever.

Children, by contrast, live with incompetence every day. They are constantly asked to do things they cannot yet do, from tying shoelaces to dividing fractions, and are surrounded by people who are better at almost everything. Far from being crushed by this, most of them treat it as normal. [D] my teacher put it, a child who plays a wrong note simply plays it again, whereas an adult stops, apologizes, and explains why the mistake happened. She has a rule for her adult students that I found irritating at first and now value enormously: in lessons, we are not allowed to apologize.

The rule sounds trivial, but it changed the way I practiced. Without the option of apologizing, I had to scrutinize the mistake itself rather than my feelings about it. Was my bow too close to the bridge, or had I moved my hand too early? Slowly I began to treat errors as information rather than as judgments of my character. (う)This, I suspect, is what children do naturally and what adults have to relearn. It is not that children do not care about getting things right; it is that they do not take getting things wrong personally.

There were other surprises, too: I had imagined that learning an instrument would be a solitary pursuit, confined to a back room, but it proved [E] social. My teacher holds a small concert twice a year at which all of her students play, from six-year-olds who have been learning for three months to a retired engineer of seventy-eight who took up the violin after his wife died. At my first concert I was so nervous that my bow quivered visibly, and I played a piece intended for young children in front of an audience that included several of them. [F], when I finished, the applause was as warm as it was for anyone else. Afterward, a girl of about nine came up to me and told me, with great seriousness, that she had also found that piece difficult at first. (え)It was one of the kindest things anyone has said to me in years.

Three years later, I am still not a good cellist, and I have stopped expecting to become one. [G], I can now play several pieces that I love, slowly but recognizably, and I practice not because I hope to perform but because the half hour each evening has become one of the calmest parts of my day. My family has stopped making jokes, [H] the dog still slinks out of the room when I tune the strings.

I have also noticed changes beyond music: at work, I am more willing to try tasks I am not sure I can do, and less upset when they go wrong. I am more patient with colleagues who are learning something new, because I remember how it feels to be the slowest person in the room. (お)Being bad at the cello, it turns out, has made me better at a number of other things. I would recommend the experience to anyone, especially to those who have become very good at avoiding it.

〔1〕 本文の空所(A)～(H)に入れるのに最もふさわしいものを，それぞれ(1)～(4)のうちから1つずつ選びなさい。

(A)

(1) Nevertheless (2) Therefore (3) In other words (4) Similarly

(B)

(1) during (2) after (3) within (4) by

(C)

(1) Because (2) Unless (3) Although (4) Once

(D)

(1) Unless (2) Though (3) Whether (4) As

(E)

(1) hardly (2) surprisingly (3) rarely (4) barely

(F)

(1) As a result (2) For example (3) Even so (4) In addition

(G)

(1) Still (2) Otherwise (3) Instead of this (4) For this reason

(H)

(1) because (2) so (3) unless (4) although

〔2〕 下線部(あ)〜(お)が本文中で表している意味・内容として最もふさわしいものを，それぞれ(1)〜(4)のうちから1つずつ選びなさい。

(あ) They come to me used to being competent, and they find it very hard to be beginners again

(1) Adults have weaker memories, so they forget what they learn.
(2) Adults are too busy with work to practice every day.
(3) Adults are used to doing things well, so starting from zero is hard for them.
(4) Adults prefer to learn from teachers of their own age.

(い) When it finally returns, it strikes like a long-forgotten fever

(1) Learning a new skill often makes adults physically ill.
(2) The discomfort of being a beginner feels very strong because we have not felt it in years.
(3) Beginners usually catch illnesses more easily than experts.
(4) Adults lose their skills after a long period of illness.

(う) This, I suspect, is what children do naturally and what adults have to relearn

(1) seeing mistakes as useful facts rather than as proof of failure
(2) apologizing to the teacher whenever a mistake is made
(3) practicing for hours without taking a break
(4) avoiding difficult pieces until the basics are perfect

(え) It was one of the kindest things anyone has said to me in years

(1) A girl criticized the author for choosing a piece for children.
(2) The teacher praised the author in front of the audience.
(3) A retired engineer offered to give the author lessons.
(4) A young girl tried to comfort the author by sharing her own experience.

(お) Being bad at the cello, it turns out, has made me better at a number of other things

(1) The author has become a professional cellist.

(2) The author has decided to give up the cello.

(3) Learning the cello has improved the author's attitude toward other challenges.

(4) Playing the cello has made the author's job less busy.

III 会話文（配点 24点）

〔1〕 次の会話の空所(あ)〜(え)に入れるのに最もふさわしい表現を(1)〜(10)のうちから1つずつ選びなさい。同じ表現を2度使ってはならない。また，使わない表現が6つある。

At a pharmacy counter

A: Good afternoon. I picked up this cough medicine here yesterday, but I think I was given the wrong one.

B: I'm sorry to hear that. (あ)

A: Sure. The doctor said I should take something that won't make me sleepy, because I drive to work. But this box says it may cause drowsiness.

B: You're right. This one is designed for use at night. (い)

A: No, I haven't. I noticed the warning before I opened it.

B: Good. Then I can exchange it for the daytime version. (う)

A: Oh, I didn't know that. Is it much more expensive?

B: Only by a dollar or so, and since the mistake was ours, there won't be any extra charge.

A: That's very kind of you. (え)

B: Three times a day after meals. And please come back if your cough hasn't improved in a week.

(1) How often should I take it?
(2) Could you show me your receipt and the box?
(3) Did you buy it online?
(4) Have you taken any of it yet?
(5) It works in exactly the same way.
(6) It's a little stronger, though.
(7) I'll call the police.
(8) We've run out of that medicine.
(9) Could you write me a new prescription?
(10) You should stop driving for a while.

〔2〕 次の会話の空所(か)〜(け)に入れるのに最もふさわしい表現を(1)〜(10)のうちから1つずつ選びなさい。同じ表現を2度使ってはならない。また，使わない表現が6つある。

Two neighbors in an apartment building

A: Excuse me, I'm Mika from apartment 304. I just moved in last weekend.

B: Oh, welcome! I'm Tobias, from 302. (か)

A: Slowly. There are still boxes everywhere. Actually, I wanted to ask you something. Which day is the garbage collected?

B: Burnable garbage goes out on Tuesdays and Fridays, and bottles and cans on Wednesdays. (き)

A: Before eight? That's early. Is there a list of the rules somewhere?

B: There's one on the board by the mailboxes. (＜) The building manager is very strict about it.

A: Thanks, I'll check it. By the way, is it always this quiet here?

B: Mostly. (け) The family upstairs has two small kids, but they're usually asleep by nine.

A: That's fine with me. Thanks so much for your help.

B: Anytime. Knock if you need anything.

(1) I'm afraid I'm moving out tomorrow.
(2) It can get a little noisy on weekends, though.
(3) Have you lived here long?
(4) How are you settling in?
(5) You have to put it out before eight in the morning.
(6) Nobody follows the rules anyway.
(7) I'd read it carefully if I were you.
(8) The garbage is collected every day.
(9) There aren't any rules here.
(10) It's the noisiest building in town.

IV　文法・語法（配点 16点）

〔〕　次の(A)〜(H)の英文の空所に入れるのに最もふさわしいものを，それぞれ(1)〜(4)のうちから1つずつ選びなさい。

(A)　She _____ for over an hour when the bus finally came.

(1) has been waiting　(2) had been waiting
(3) waits　(4) is waiting

(B)　He seems _____ sick yesterday, because he didn't come to school.

(1) to be　(2) being　(3) to have been　(4) have been

(C)　_____ finishes first can leave early.

(1) Whoever　(2) Whomever　(3) Whose　(4) Which

(D)　I was _____ tired that I fell asleep on the train.

(1) such　(2) too　(3) very　(4) so

(E)　_____ I known you were in town, I would have called you.

(1) Had　(2) If　(3) Should　(4) Were

(F)　Many residents object _____ working on Sundays.

(1) with　(2) for　(3) to　(4) at

(G)　Our new office is twice as large _____ the old one.

(1) than　(2) that　(3) like　(4) as

(H)　There _____ no buses that late, we had to walk home.

(1) to be　(2) being　(3) be　(4) been

V 語彙（配点 20点）

〔1〕 次の(A)〜(E)の英文の空所に入れる語として最もふさわしいものを，それぞれ(1)〜(4)のうちから1つずつ選びなさい。

(A) The car splashed through a _____ and soaked my trousers.
(1) pebble (2) pillar (3) puddle (4) parcel

(B) My hay fever is so bad that I can't stop _____.
(1) sneezing (2) shivering (3) staring (4) sighing

(C) The box says "Handle with care" because the glasses inside are _____.
(1) flexible (2) fragile (3) fertile (4) fluent

(D) Please _____ of your batteries at the collection point.
(1) dispute (2) display (3) dismiss (4) dispose

(E) He _____ agreed to help, although he had no desire to.
(1) eagerly (2) proudly (3) reluctantly (4) cheerfully

〔2〕 次の(A)〜(E)の英文の下線部の語に意味が最も近いものを，それぞれ(1)〜(4)のうちから1つずつ選びなさい。

(A) It was <u>evident</u> from her face that she was upset.
(1) clear (2) puzzling (3) distant (4) gentle

(B) The coach <u>resigned</u> after the team lost ten games in a row.
(1) joined (2) quit (3) criticized (4) visited

(C) The hospital lacked <u>adequate</u> equipment.
(1) missing (2) expensive (3) modern (4) sufficient

(D) It is hard to <u>sustain</u> a high speed on this mountain road.
(1) break (2) lower (3) record (4) keep

(E) Many people are <u>hesitant</u> to speak in public.
(1) eager (2) able (3) unwilling (4) invited

解答用紙（マーク式）　予想問題 第2回
