予 想 問 題　第 3 回

全 学 統 一 方 式 （ 文 系 ） 対 策

英 語 問 題

立命館大学 全学統一方式（文系）の出題形式に準拠 ／ 問題

注　意

1. 問題部分とマーク式の解答用紙で構成されている（問題部分 1〜10ページ・解答用紙 11ページ）。
2. 試験時間の目安は80分。大問は I〜V の5題で，すべて選択式である。
3. 答えは，解答用紙の該当する番号の円を塗りつぶす（〇で囲むだけでもよい）。
4. 配点は I 26点・II 34点・III 24点・IV 16点・V 20点（計120点）。本予想問題が独自に定めた配点である。
5. 本冊子の英文・設問はすべてオリジナルである。登場する人物・団体・場所は架空である。

立命館大学の過去問・公式問題ではありません。予想問題であり，大学とは関係がありません。
本冊子は過去の出題形式を分析して作成した練習用の教材です。

I 長文読解（配点 26点）

以下の英文を読み，後の問いに答えよ。

In a narrow kitchen at the back of a former schoolhouse, Paulina Ferreira is watching an eighty-seven-year-old woman knead[1] dough with her knuckles. Ferreira does not interrupt. Notebook in one hand and digital scale in the other, she periodically asks the woman to pause so that she can weigh a fistful of flour. “My grandmother never measured anything either,” Ferreira says later. “If you asked her how much salt to use, she would say, ‘Enough.’ That answer is beautiful, but it is very hard to pass on.”

Ferreira, fifty-one, is the founder of the Vale Escuro Kitchen Archive, a project that records the recipes and cooking methods of elderly residents in a cluster of mountain villages in northern Portugal. Over nine years, she and a few volunteers have documented more than four hundred dishes, from breads and soups to sweets baked only for a particular saint’s festival. Each recipe is written down in precise measurements, photographed step by step, and filmed, so that someone who has never visited the region could reproduce it.

She did not set out to become an archivist. Ferreira trained as a pastry chef in Lisbon and spent nearly two decades working in hotel kitchens, first in Portugal and later in Switzerland. The work was lucrative but relentless. When her mother became ill in 2014, Ferreira moved back to the village to care for her, intending to stay for a few months. “I thought I would return to the hotels once she recovered,” she says. “Instead, I discovered that the village I remembered was disappearing.”

The figures are stark. Like many rural areas in southern Europe, the villages around Vale Escuro have been hollowed out as the young drift to the cities; the primary school closed in 2009, and most remaining residents are over seventy. When Ferreira returned, she noticed that many of the dishes she remembered from childhood were no longer being made, simply because the people who knew how to make them lived alone and had no one to cook for. “Recipes do not die all at once,” she says. “They fade, a little more each winter, until one day nobody remembers whether the cabbage went in before the potatoes or after.”

Her first recordings were makeshift: she visited neighbors with a bag of ingredients and scribbled notes on whatever paper was at hand. Word spread quickly, and soon people were knocking on her door to offer recipes of their own. Some brought their mothers’ handwritten notebooks, smudged and full of cryptic abbreviations. In 2016 the local council allowed her to use the empty schoolhouse, and the archive acquired a permanent home.

Recording a recipe, Ferreira insists, involves far more than listing ingredients. Many of the older cooks rely on cues that are difficult to put into words: the sound a pan makes when the oil

is hot enough, the way dough feels when it has been kneaded long enough, or the smell that signals that chestnuts[2] are ready. To capture these details, the team films each session from several angles and asks the cooks to describe what they are noticing as they work. Ferreira's professional training has proved invaluable. "A chef learns to translate feelings into numbers," she says. "That is exactly what we are doing here, only in reverse."

The archive has had effects that Ferreira did not anticipate. Several of the elderly cooks, who had long assumed that their knowledge was of no interest to anyone, have become minor local celebrities, invited to give demonstrations at schools and markets. A summer cooking class in the old schoolhouse attracts participants from Lisbon, Porto, and abroad, and its fees help sustain the project. Two young couples have even moved to the area and opened a small bakery that sells breads made according to recipes from the archive.

Not everyone has welcomed the attention. Some residents worry that writing recipes down will strip them of their meaning, turning family traditions into products for tourists. Others feel that certain dishes belong to particular households and should not be shared at all. Ferreira respects these concerns. Contributors decide which recipes may be published and which are kept private, and a number of entries in the archive are visible only to the families who provided them. "A recipe is not just information," she says. "Sometimes it is the last thing a person has left of their mother."

Funding remains precarious. The archive relies on a modest grant from a cultural foundation, the summer classes, and a team of volunteers, most of whom are themselves retired. Ferreira hopes eventually to publish a printed collection, but she is cautious about moving too quickly. Her priority, she says, is to keep recording while the oldest cooks are still able to stand at the stove. Three of the women who contributed to the project's first year have since died, and their recordings are now the only complete account of how they cooked.

Back in the kitchen, the dough has been shaped into a round loaf and placed in a wood-fired oven. The elderly cook wipes her hands on her apron and eyes Ferreira's notebook with mild suspicion. "Did you write down everything?" she asks. Ferreira assures her that she has. The old woman laughs. "Then you know more than I do," she says, "because I have never written down anything in my life."

1. knead　（パン生地などを）こねる
2. chestnut　栗
3. archivist　記録保管人
4. pastry chef　菓子職人
5. abbreviation　略語
6. cue　手がかり・合図
7. apron　エプロン

〔1〕 次の問い(A)〜(D)に対する答えとして最もふさわしいものを，本文の内容に基づいて(1)〜(4)のうちから1つずつ選びなさい。

(A) Why did Ferreira return to her village?

(1) She moved home to look after her sick mother and saw that local cooking was vanishing.
(2) She lost her job at a hotel in Switzerland and could not find another one.
(3) She was invited by the local council to open a cooking school.
(4) She wanted to write a cookbook about Swiss and Portuguese food.

(B) According to the article, why are some traditional dishes no longer being made?

(1) The ingredients needed for them are now impossible to grow in the region.
(2) Many of the people who knew them live alone and no longer cook them.
(3) Young people in the cities have found the recipes and changed them.
(4) The local primary school stopped teaching cooking in 2009.

(C) Why has Ferreira's training as a chef been useful for the archive?

(1) It allows her to improve the old recipes so that they taste better.
(2) It means she can cook every dish faster than the elderly cooks.
(3) It helps her turn cooks' instincts and senses into exact measurements.
(4) It makes the elderly cooks trust her more than other volunteers.

(D) How does the archive respond to residents' concerns about privacy?

(1) Every recipe in the archive is published online for anyone to use.
(2) Recipes are sold to tourists to raise money for the project.
(3) Only recipes from professional chefs are included in the archive.
(4) Families can choose to keep some recipes from being made public.

〔2〕 次の(1)〜(5)の英文について，本文の内容に合うものは 1，合わないものは 2，本文からは合うとも合わないとも決められないものは 3 を選びなさい。

(1) Ferreira worked in hotel kitchens in two different countries.

(2) The schoolhouse used by the archive was built specially for the project.

(3) Most of the participants in the summer cooking class are under thirty.

(4) Ferreira plans to publish a printed collection as soon as possible.

(5) The elderly cook in the final scene has never kept written records of her cooking.

〔3〕 本文全体の内容を表す題として最もふさわしいものを(1)〜(5)のうちから1つ選びなさい。

(1) The hard life of chefs in international hotels
(2) Saving a region's cooking before it is forgotten
(3) How tourism has changed the mountain villages of Portugal
(4) Why young people leave rural areas for the cities
(5) A new bakery that sells traditional bread

II 長文読解（配点 34点）

以下の英文を読み，後の問いに答えよ。

For six years, I never went for a run without my watch. It tallied my distance, my speed, my heart rate, my cadence in strides per minute, and even how many hours I had slept the night before, metrics I once found endlessly fascinating. After each run I would sit on the front step, still panting, and scrutinize the numbers with the kind of fixated attention I had once given to exam results. [A] my pace had improved, I felt a small rush of satisfaction; if it had slipped, the remainder of my morning was quietly soured.

I had started running in my late thirties, mainly to clear my head after long days at a desk. At first I ran without any equipment at all, choosing meandering routes on a whim and turning back whenever I felt weary. The watch was a birthday present from my sister, who meant it kindly and who still cannot fathom why I eventually banished it to a drawer. [B], I loved it. It made my progress visible, and for a while that visibility was enormously motivating. (あ)I could see, in neat graphs, that I was becoming the person I hoped to be.

The trouble began so gradually that I did not notice it. I started to choose routes [C] on how easily they would produce good numbers rather than on how pleasant they were. The hilly path along the river, which I had once cherished for its views of the herons, vanished from my week because it made my average pace look sluggish. I stopped running in the drizzle, not because I minded getting soggy but because the slippery pavement slowed me down. On days when I felt tired, I ran anyway, because the watch had begun to remind me that I had not yet reached my weekly target.

None of this felt like a problem at the time. [D], I thought I was becoming more disciplined. It was only when I injured my knee, and a physiotherapist told me to stop running for two months, that I realized how much the numbers had taken over. During those weeks I felt not only frustrated but strangely adrift, as if I had misplaced part of my identity. (い)What I missed was not running so much as the daily verdict that the watch delivered. Without it, I did not know whether I was doing well.

When I was finally allowed to run again, the physiotherapist gave me a piece of advice that I initially brushed aside. For the first month, she said, I should run without measuring anything: no watch, no phone, no target. I was to go out, run for as long as it felt comfortable, and come home. I agreed grudgingly, mainly to avoid an argument, and I fully expected to resume tracking as soon as the month was over. That is not [E] happened.

The first few runs were uncomfortable in an unexpected way. Without the numbers, I kept glancing at my bare wrist, utterly unsure whether I was running fast or slowly. [F], after a

week or so, something shifted. I began to notice things I had not paid attention to in years: the smell of freshly cut grass in the park, the shimmering color of the river in the early morning, the old man who waved from the same bench every Tuesday. I went back to the hilly path and found that the herons were still there. (う)I had not stopped seeing these things because they had disappeared.

I also began to listen to my body in a way the watch had discouraged. On some days I felt buoyant and ran further than I had planned; on others I felt heavy and turned back after fifteen minutes without any sense of guilt. Oddly, I became more consistent rather than less, perhaps because running no longer felt like a test that I might fail. My knee, [G], has not troubled me since.

I do not want to exaggerate: measurement is enormously useful, and for many runners, especially those training for a particular race, it is indispensable. A watch can warn you that you are overtraining, reveal patterns you would never have noticed, and give a beginner the encouragement of watching small improvements accumulate. My point is narrower. (え)A number that is meant to describe an activity can quietly begin to define it, and once that happens, we may find ourselves pursuing the number rather than the experience it was supposed to measure.

These days, I wear the watch about once a month, usually on a route I know well, simply out of curiosity. Otherwise it sits idle in the drawer, much to my sister's disappointment. I run more slowly than I did at my peak, and I could not tell you my average pace for last week, nor do I care to know. [H], I enjoy running more than I have at any time since I started. (お)I have come to think that some of the things we value most are precisely those that resist being counted, and that the effort to count them can, without our realizing it, change what we value.

〔1〕 本文の空所(A)～(H)に入れるのに最もふさわしいものを，それぞれ(1)～(4)のうちから1つずつ選びなさい。

(A)

(1) Unless (2) Although (3) If (4) Before

(B)

(1) At first (2) In the end (3) As a result (4) Instead

(C)

(1) focused (2) based (3) relied (4) insisted

(D)

(1) For example (2) Likewise (3) In addition (4) On the contrary

(E)

(1) that (2) which (3) how (4) what

(F)

(1) Therefore (2) Similarly (3) However (4) In short

(G)

(1) unfortunately (2) incidentally (3) consequently (4) nevertheless

(H)

(1) Yet (2) So (3) Besides (4) Otherwise

〔2〕 下線部(あ)～(お)が本文中で表している意味・内容として最もふさわしいものを，それぞれ(1)～(4)のうちから1つずつ選びなさい。

(あ) I could see, in neat graphs, that I was becoming the person I hoped to be

(1) The data on the watch showed that the author was making progress toward a goal.
(2) The watch helped the author find people with similar interests.
(3) The author began drawing graphs as a new hobby.
(4) The watch told the author which job would suit her best.

(い) What I missed was not running so much as the daily verdict that the watch delivered

(1) The author missed exercising with friends every day.
(2) The author missed running so much that she ignored the physiotherapist.
(3) The author missed the watch because it was a gift from her sister.
(4) The author missed being judged by the numbers more than running itself.

(う) I had not stopped seeing these things because they had disappeared

(1) The herons had left the river for several years.
(2) The author's eyesight had become weaker over time.
(3) The things had been there all along, but the author had stopped noticing them.
(4) The park had been closed while the author was injured.

(え) A number that is meant to describe an activity can quietly begin to define it

(1) Numbers can never describe an activity accurately.
(2) Measuring an activity can gradually change what people think the activity is for.
(3) People should stop measuring all of their activities.
(4) Measurement is useful only for professional athletes.

(お) I have come to think that some of the things we value most are precisely those that resist being counted

(1) People should count everything they value as carefully as possible.
(2) Some of the most important things in life cannot easily be measured.
(3) Running fast is more valuable than enjoying a run.
(4) Things that are difficult to measure are usually unimportant.

III 会話文（配点 24点）

〔1〕 次の会話の空所(あ)〜(え)に入れるのに最もふさわしい表現を(1)〜(10)のうちから1つずつ選びなさい。同じ表現を2度使ってはならない。また，使わない表現が6つある。

At a lost-and-found office in a department store

A: Hello. I think I left my umbrella somewhere in the store about an hour ago.

B: I see. (あ)

A: It's dark green with a wooden handle. There's a small tag on it with my initials, R.K.

B: Let me check. We've had several umbrellas handed in today. (い)

A: I was on the fourth floor, in the bookstore, and then I had lunch at the café on the sixth floor.

B: Hmm, nothing from the bookstore yet, but the café sent one down a few minutes ago. Is this it?

A: (う) Thank you so much. It was a present from my grandmother.

B: I'm glad we found it. (え)

A: Of course. Here's my driver's license.

B: Thank you. Please sign here, and you're all set.

(1) Can you tell me where you went in the store?
(2) I'm afraid we don't keep lost items.
(3) What does it look like?
(4) Yes, that's the one!
(5) This is my first visit to this store.
(6) I just need to see some identification.
(7) No, mine was red.
(8) Could you come back next week?
(9) You can buy a new one on the first floor.
(10) Did you check the parking lot?

〔2〕 次の会話の空所(か)〜(け)に入れるのに最もふさわしい表現を(1)〜(10)のうちから1つずつ選びなさい。同じ表現を2度使ってはならない。また，使わない表現が6つある。

Two coworkers planning a farewell party

A: Have you heard that Ms. Hartley is retiring when next month ends?

B: Yes, I can't believe it. She's been here longer than anyone. (か)

A: That's what I wanted to talk to you about. I was thinking of a dinner at that Italian place near the station.

B: Good idea, but it's quite small. (き)

A: Probably around thirty, if everyone from both floors comes.

B: Then we might need somewhere bigger. (く)

A: Oh, I didn’t know they did that. Could you ask them about prices?

B: Sure, I’ll call them this afternoon. What about a present?

A: She loves gardening, so maybe a set of good tools?

B: (け) She mentioned last week that she wants to grow vegetables after she retires.

(1) She hates parties, so let’s not bother.
(2) How many people do you expect?
(3) Are we doing anything for her?
(4) Perfect.
(5) The hotel across the street rents out rooms for events.
(6) I’ve already booked the Italian place.
(7) She’s not retiring after all.
(8) Let’s just give her flowers.
(9) Only five people will come.
(10) I don’t really know her.

IV　文法・語法（配点 16点）

〔　次の(A)〜(H)の英文の空所に入れるのに最もふさわしいものを，それぞれ(1)〜(4)のうちから1つずつ選びなさい。

(A) By the time you arrive, we _____ the preparations.

(1) have finished　(2) finished
(3) will have finished　(4) had finished

(B) It cost me two hundred dollars _____ my laptop.

(1) repairing　(2) repair　(3) repaired　(4) to repair

(C) The town is very different from _____ it was twenty years ago.

(1) what　(2) that　(3) which　(4) whether

(D) _____ I got home did I realize that I had lost my key.

(1) Only if　(2) Not until　(3) Even though　(4) As soon as

(E) I wish my neighbor _____ stop playing loud music at night.

(1) will　(2) would　(3) can　(4) shall

(F) She finally succeeded _____ persuading her parents.

(1) on　(2) at　(3) in　(4) for

(G) Reading is to the mind _____ exercise is to the body.

(1) as　(2) so　(3) than　(4) that

(H) _____ lived there before, I knew the best places to eat.

(1) to have　(2) have　(3) had　(4) having

V 語彙（配点 20点）

〔1〕 次の(A)〜(E)の英文の空所に入れる語として最もふさわしいものを，それぞれ(1)〜(4)のうちから1つずつ選びなさい。

(A) Walking in my new shoes gave me a painful _____ on my heel.
(1) blister (2) blizzard (3) blanket (4) bladder

(B) This medicine may make you _____, so do not drive after taking it.
(1) thrifty (2) stubborn (3) vivid (4) drowsy

(C) You will need to show your _____ if you want to return the item.
(1) recipe (2) remedy (3) receipt (4) riddle

(D) _____ the beans in water overnight before you cook them.
(1) sew (2) soak (3) sweep (4) swell

(E) He ended the phone call _____, without even saying goodbye.
(1) gradually (2) abruptly (3) patiently (4) politely

〔2〕 次の(A)〜(E)の英文の下線部の語に意味が最も近いものを，それぞれ(1)〜(4)のうちから1つずつ選びなさい。

(A) Filling in all these forms is a tedious task.
(1) dull (2) exciting (3) expensive (4) necessary

(B) The city decided to prohibit cars in the old town center.
(1) allow (2) repair (3) measure (4) ban

(C) The project required an immense amount of time.
(1) tiny (2) empty (3) enormous (4) ancient

(D) The museum is offering a temporary exhibition of local art.
(1) permanent (2) noisy (3) brief (4) careful

(E) Bad weather forced the climbers to abandon their plan.
(1) carry on (2) look up (3) set up (4) give up

解答用紙（マーク式）　予想問題 第3回
