英 語 問 題

弘前大学（英語を課す学部で共通）の出題形式に準拠 ／ 問題

注　意

1. 問題部分と解答用紙で構成されている（問題部分 1〜7ページ・解答用紙 8〜10ページ）。答えは解答用紙の決められた欄に書くこと。
2. 試験時間の目安は90分。大問は 1〜4 の4題。日本語で答える設問と英語で答える設問がある。
3. 配点は 1 50点・2 50点・3 50点・4 50点（計200点）。本予想問題が独自に定めた配点である。
4. 本冊子の英文・設問はすべてオリジナルである。登場する人物・団体・地名は架空。

弘前大学の過去問・公式問題ではありません。予想問題であり，大学とは関係がありません。
本冊子は過去の出題形式を分析して作成した練習用の教材です。

1　長文読解（配点 50点）

以下の英文を読んで，後の設問に日本語で答えよ。（＊印の語句は英文の後で説明している。）

① On the first Saturday of every month, a church hall in a small northern town fills with an unusual collection of objects: toasters that no longer heat, lamps with loose wires, children's bicycles with broken chains, and jackets missing their zips＊. Their owners have not come to throw them away. They have come to a repair café, an event at which volunteers with practical skills help visitors fix the things they own, free of charge. (1)What began as a small experiment in one neighbourhood has spread to many towns and cities in different countries, and the idea now attracts people who care about the environment, local communities and even education.

② The rules at most repair cafés are simple but important. Visitors do not hand over their broken item and wait for it to be returned; they sit beside the volunteer and join in the repair themselves. (2)This is what separates a repair café from an ordinary repair shop. The aim is not simply to save one toaster, but to give people the confidence to open the next broken thing they find instead of assuming that it is beyond help. Many visitors say that the most valuable thing they take home is not the repaired object but the discovery that the inside of a machine is not a mystery.

③ Supporters argue that the environmental case is obvious. Every object that is repaired is one less object that ends up in a landfill＊, and one less new product that has to be manufactured, packed and shipped across the world. Electronic goods are a particular concern, because they contain metals that are difficult to recover and plastics that can remain in the ground for centuries. Yet the volunteers themselves often describe their motives in more personal terms. A retired electrician might say that he simply enjoys solving puzzles, while a young student who learned to sew from her grandmother might welcome the chance to pass that skill on to someone else.

④ (3)Repair cafés also do something that is harder to measure: they bring together people who would rarely meet otherwise. In a typical session, a teenager waiting for help with a games controller may end up chatting with an elderly woman whose radio was a wedding present sixty years ago. Because there is always some waiting involved, tea and cake are usually served, and the event begins to feel less like a service and more like a social gathering. For people who live alone, the monthly visit can become one of the few occasions on which they talk to neighbours for more than a few minutes.

⑤ Not every repair succeeds, of course. Some products are designed in ways that make repair almost impossible: their cases are glued shut rather than held together with screws, or spare parts are simply not sold to the public. Volunteers frequently find themselves explaining

that a fault could be fixed in minutes if only the right part were available. (4)Partly because of such experiences, the movement has become linked to wider calls for a “right to repair,” the idea that manufacturers should make spare parts, tools and instructions available so that products can be fixed by their owners or by independent repairers.

⑥ Some schools have begun to borrow the idea as well. Instead of only reading about recycling in textbooks, pupils bring in broken toys or headphones and work in small groups to find out what has gone wrong. Teachers often notice that even pupils who struggle in ordinary lessons become absorbed when they have a real object in their hands and a clear problem to solve. Whether in a church hall or a classroom, the message is the same: before we replace something, it is worth asking whether it can be given a second life.

zips　　ファスナー（英）
landfill　ごみの埋め立て地

設問 1　下線部(1)を和訳せよ。

設問 2　下線部(2)の This が指す内容を明らかにしたうえで，リペアカフェがそのような方法をとる目的を，段落②に即して日本語で説明せよ。

設問 3　下線部(3)について，リペアカフェが「ふだんは出会うことのない人々」を結びつけるのはどういうことか。段落④に挙げられている例や事情に触れながら日本語で説明せよ。

設問 4　下線部(4)について，リペアカフェの運動が「修理する権利」を求める声と結びついたのは，ボランティアのどのような経験のためか。また，「修理する権利」とはどのような考えか。それぞれ日本語で説明せよ。

2　英文の要約（配点 50点）

次の英文の内容を，400字程度の日本語でまとめよ。句読点も1字に数える。（＊印の語句は英文の後で説明している。）

In many cities, small patches of unused land sit between buildings, beside railway lines or along the borders of car parks. For decades these spaces were either covered with concrete or left to fill with litter and weeds. In recent years, however, more and more local groups have started to turn them into what are often called tiny forests: densely planted areas, sometimes no larger than a tennis court, in which dozens of different native trees and shrubs＊ are grown close together.

The method behind these forests is quite different from the way trees are usually planted in parks. Instead of placing a few large trees far apart on a neat lawn, volunteers first improve the soil and then plant young seedlings only a short distance from one another, mixing tall species with smaller ones that naturally grow beneath them. Because the plants compete for light, they grow upwards quickly, and after two or three years of weeding and watering the forest is usually expected to look after itself. Supporters claim that such a site can become thick and green far sooner than a conventional planting.

The benefits most often mentioned are environmental. A dense group of trees provides shade and releases moisture into the air, which can make the surrounding streets noticeably cooler on hot summer afternoons. The leaves catch some of the dust produced by traffic, and the soil beneath them absorbs rainwater that would otherwise rush into drains. Perhaps most strikingly, these small forests quickly attract insects, birds and other creatures that had disappeared from the neighbourhood, so that a space once used only for dumping rubbish becomes a home for wildlife.

Yet many organisers insist that the social effects matter just as much. Planting days often bring together hundreds of residents, from young children to retired people, who might otherwise never have spoken to one another. Schools use the forests as outdoor classrooms where pupils measure the growth of the trees and record the animals they see. Because local people have planted the forest with their own hands, they often feel responsible for it, and vandalism＊ is reportedly rare.

Not everyone is convinced, however. Some ecologists point out that a forest the size of a tennis court cannot replace large natural woodlands, and they worry that city councils may use tiny forests as an excuse for allowing bigger green spaces to be destroyed. Others note that the claims about rapid growth come mostly from enthusiastic supporters rather than from careful long-term observation, and that planting so many trees so close together may lead many of them

to die as the forest matures. There are practical problems, too: suitable land is not always available, and the early years of maintenance depend heavily on volunteers who may lose interest.

Most people involved therefore present tiny forests not as a solution to environmental problems but as one small step that ordinary citizens can take where they live. A city will not be saved by a few hundred trees on a former car park. What such projects can do is make nature visible in places where it had vanished, and remind residents that the condition of their surroundings is partly in their own hands. If that awareness leads people to protect larger forests as well, the value of these small patches of green may be far greater than their size suggests.

shrubs　　低木
vandalism　（公共物などを）わざと壊す行為

3　会話の完成・日本の事物の説明（配点 50点）

設問 **1**

Ines, an exchange student staying in your town, talks with you in the two dialogues below. Write the missing end of the final line of each dialogue in English, adding specific details.

Conversation A

Ines: The winter break starts next week, and I still haven't decided what to do. There are three programmes for international students, but I can only join one.

You: What are the choices?

Ines: The first is a five-day ski course in the mountains. It's quite expensive, but the instructors speak English, and I've never skied before.

You: That sounds exciting. And the others?

Ines: The second is a three-night stay at a temple. You get up at five, help clean the buildings and eat simple vegetarian meals. It's cheap, but nobody there speaks English, so I'd have to use my Japanese all the time.

You: Wow, that would be good practice.

Ines: And the third is helping at an apple farm for a week. The farmers prune* the trees in winter, and they give you a room and meals for free. The catch is that it's cold outside all day, and I really hate the cold.

You: If I were in your position, I'd choose [. . .], because [. . .].

Conversation B

You: My room is such a mess. I've been meaning to tidy it for weeks, but every time I start, I give up after ten minutes.

Ines: My sister used to be the same. Then she read about a method that worked for her. First, you don't try to tidy the whole room at once. You pick one small area, like a single drawer or one shelf, and finish it completely.

You: Just one drawer? That doesn't sound like much.

Ines: That's the point. When you finish something, you feel good, so you feel like starting the next area. She also had a rule: if she hadn't used something for a year, she gave it away or recycled it.

You: A whole year? I think I'd find that hard.

Ines: She found it hard too, at first. So she put those things in a box with the date on it. If she didn't open the box for three months, she donated everything inside without looking. And the last thing she did was give everything a fixed place, so she always knew where to put it back.

You: Let me think. So, to finally get my room tidy before the weekend, I should [. . .].

設問 **2**

Ines, an exchange student, has asked you about the Japanese expressions below. In two or three English sentences each, describe what they mean and show a situation in which people use them. Do not just translate them.

A. お疲れさま（おつかれさま）

B. こたつ

4　英作文（配点 50点）

Some towns in Japan are considering a rule that bans the use of smartphones while walking on public streets.

Write an essay of about 100 English words that gives one advantage and one disadvantage of such a rule. Your essay should open with a brief introduction.

If you like, you can use these phrases:

> One benefit of this rule is that . . .
> A drawback is that . . .
