英 語 問 題

弘前大学（英語を課す学部で共通）の出題形式に準拠 ／ 問題

注　意

1. 問題部分と解答用紙で構成されている（問題部分 1〜6ページ・解答用紙 7〜9ページ）。答えは解答用紙の決められた欄に書くこと。
2. 試験時間の目安は90分。大問は 1〜4 の4題。日本語で答える設問と英語で答える設問がある。
3. 配点は 1 50点・2 50点・3 50点・4 50点（計200点）。本予想問題が独自に定めた配点である。
4. 本冊子の英文・設問はすべてオリジナルである。登場する人物・団体・地名は架空。

弘前大学の過去問・公式問題ではありません。予想問題であり，大学とは関係がありません。
本冊子は過去の出題形式を分析して作成した練習用の教材です。

1　長文読解（配点 50点）

以下の英文を読んで，後の設問に日本語で答えよ。（＊印の語句は英文の後で説明している。）

① Almost everyone has had the experience of sitting down on a Sunday evening to finish a piece of homework that was supposed to take an hour, only to find themselves still working at midnight. What is strange is not that we sometimes misjudge how long a task will take, but that we keep making the same mistake in the same direction. (1)We rarely finish things much earlier than planned, yet we regularly finish them much later, even when we have done similar tasks many times before. Psychologists have a name for this habit: the planning fallacy＊.

② The planning fallacy is not limited to students. Most of us have seen this in our own lives. A school festival that is planned for weeks still needs a final night of panic, and a room that someone planned to paint in a single afternoon is still half done when the weekend ends. Even the people who plan such things for a living make the same error. Building projects, new computer systems and public events are often completed months or years behind schedule and well over budget. What makes the pattern so puzzling is that the people involved are usually experienced and well informed. If asked how long similar projects have taken in the past, they can often give an accurate answer. When they estimate their own project, however, they seem to forget that knowledge completely.

③ One explanation is that (2)we imagine the future as a smooth story in which everything goes according to plan. When we picture writing an essay, we see ourselves opening the books, making notes and typing steadily until the end. We do not picture the friend who calls in the middle, the website that will not load, or the paragraph that has to be rewritten three times. Each of these interruptions may seem unlikely on its own, but the chance that at least one of them will happen is very high. Because our imagined story leaves them all out, our estimate is almost certain to be too short.

④ A second explanation concerns the way we think about our past. When a task took longer than expected, we tend to blame special circumstances: the printer happened to break, or a relative happened to visit. Since we treat each delay as an exception, we do not learn from it, and the next plan is just as hopeful as the last. Our wishes may also play a part. If we want to believe that we can finish the job before the weekend, it becomes easier to ignore the evidence that we probably cannot.

⑤ Fortunately, there are ways to reduce the problem. (3)The most effective one is surprisingly simple: instead of examining every step of the task one by one, look at how long similar tasks have taken in the past. If your last three reports each took about six hours, it is wise to plan for six hours this time too, however confident you feel. Another useful step is to

divide a large task into smaller parts and estimate each part separately, which makes it harder to overlook steps that seemed too small to mention. Some people also ask a friend to estimate for them, since an outsider is less influenced by hopes about how things will go.

⑥ Seeing our optimism only as a weakness, though, would be a mistake. (4)If we always considered every possible difficulty, we might never start anything ambitious at all. Many projects that later proved valuable were begun by people who underestimated how hard they would be. The aim, therefore, is not to stop being hopeful, but to keep our hopes for the result while staying realistic about how long it will take to get there.

fallacy　誤った考え・思い込み

設問 1　下線部(1)を和訳せよ。また，筆者がこのことを「奇妙だ」と考えている理由を，段落①に書かれていることをもとに日本語で述べよ。

設問 2　下線部(2)のように未来を思い描くと，なぜ作業時間の見積もりが短くなりすぎるのか。段落③の例に触れながら日本語で説明せよ。

設問 3　下線部(3)の方法について，その内容を具体例とともに説明せよ。また，段落⑤で紹介されているそれ以外の二つの方法も日本語で説明せよ。

設問 4　下線部(4)を和訳せよ。また，段落⑥で筆者が最終的に勧めている態度を日本語で説明せよ。

2　会話文と英文の作成（配点 50点）

以下の会話文を読んで，後の設問に答えよ。地方の町の大学に通う Wren，Bastien，Yuzuki が，町のバス路線について話している。

Wren: Did you see the notice at the bus stop? The number 7 bus is going to run only four times a day from April.

Bastien: Four times? That's the bus I take to the supermarket. (1)

Yuzuki: Apparently not enough people use it. My uncle works for the town office, and he says most of the buses are almost empty except in the morning.

Wren: That makes sense, but it's a problem for older people. My neighbour gave back her driving licence last year, and the bus is the only way she can get to the hospital. (2)

Yuzuki: Actually, the town is thinking about something different. Instead of big buses on fixed routes, it wants to try small vans that you book by phone or with an app.

Bastien: So the van comes to your house when you call it?

Yuzuki: Not exactly to your door, but to a stop near your home. (3) The town says it would cost less than running empty buses all day.

Wren: Sounds convenient, though I wonder if everyone can use an app. My neighbour doesn't even have a smartphone.

Yuzuki: That's why they plan to keep the phone booking too. (4)

Bastien: I think it's worth trying. In my home town, we had something similar, and at first people complained, but after a year nobody wanted the old buses back.

Wren: Maybe. (5) Otherwise the people who need the service most will be the ones left behind.

設問　(1)〜(5) に入れるのにふさわしい英文を，次の (a)〜(e) の日本語の意味を表すように書け。解答欄［A］には空所に対応する記号 (a)〜(e) を記入し，［B］にはその英文を書くこと。

(a)　大学の学生ボランティアが，お年寄りに予約の仕方を教える手伝いをすることになっているそうだよ。

(b)　もし本数が減ったら，彼女は病院へ行くたびにタクシーを使わなければならなくなるでしょう。

(c)　でも，お年寄りの意見を最初から聞いてもらうことが大切だと思うな。

(d)　どうして町はそんなに本数を減らすことにしたんだろう。

(e)　同じ方向に行く乗客を何人か乗せていくので，一人で乗るタクシーよりずっと安いんだって。

3　会話の完成・日本の事物の説明（配点 50点）

設問 **1**

Here are two short exchanges between you and Bastien, a classmate from overseas. Finish the last thing you say in each one in English, with concrete details.

Conversation A

Bastien: My little sister is visiting me next weekend. She's eleven, and she has never been to Japan. I want her to have a good time, but I have no plans yet.

You: What does she like doing?

Bastien: She loves animals and drawing, but she gets tired of long walks very quickly, and she doesn't like crowds.

You: Let me think. There's a small farm park on the edge of town where you can feed goats and rabbits. It's quiet, but it's about an hour away by bus.

Bastien: An hour on the bus might be hard for her.

You: There's also an art workshop at the community centre on Saturday morning. Children can paint their own paper lanterns. It's just a ten-minute walk from your flat, but it's only in Japanese.

Bastien: Hmm, they both have good points. Which one should we choose?

You: I'd recommend `[...]`, because `[...]`.

Conversation B

You: I have to give a five-minute speech in English next month, and I'm already nervous. Whenever I speak in front of people, my mind goes blank.

Bastien: I used to have the same problem. My drama teacher gave me some advice that really helped. First, don't try to memorise the whole speech word for word. Just remember the main points in order.

You: But what if I forget what to say?

Bastien: That's the second thing. Write each main point on a small card, only a few words, so you can glance at it. And practise out loud, not just in your head, at least five times. It feels strange to begin with, yet it works.

You: Out loud? Even at home?

Bastien: Especially at home. Record yourself on your phone and listen. You'll notice where you speak too fast. Finally, on the day, look at two or three friendly faces in the audience instead of trying to look at everyone.

You: That's helpful. So, to get ready for my speech, I should `[...]`.

設問 **2**

Bastien, who recently arrived from overseas, wants to know about the Japanese things listed below. Describe each one in two or three sentences of English, adding an example or a detail, so that he can picture it. Translating the word is not enough.

A. お年玉（おとしだま）

B. 回転寿司（かいてんずし）

4　英作文（配点 50点）

Many schools in Japan now give every student a tablet computer for use in lessons.

In an essay of about 100 English words, first describe some benefits this change has brought, and then explain problems that have not yet been solved.
