英 語 問 題

岩手大学（人文社会科学部・教育学部 共通問題）の出題形式に準拠 ／ 問題

注　意

1. 問題部分と解答用紙で構成されている（問題部分 1〜6ページ・解答用紙 7〜8ページ）。答えは解答用紙の決められた欄に書くこと。
2. 試験時間の目安は90分。大問は 1〜3 の3題。日本語で答える設問と英語で答える設問がある。
3. 配点は 1 80点・2 60点・3 60点（計200点）。本予想問題が独自に定めた配点である。
4. 本冊子の英文・設問はすべてオリジナルである。登場する人物・団体・地名は架空。

岩手大学の過去問・公式問題ではありません。予想問題であり，大学とは関係がありません。
本冊子は過去の出題形式を分析して作成した練習用の教材です。

1　長文読解（配点 80点）

英文を読んで，後に続く設問に日本語で解答しなさい。（＊印の語には，英文の末尾に意味を示してある。）

For most of the twentieth century, a public library was a quiet building full of books, and its main job was to lend them. Visitors were expected to whisper, and the librarian's best-known word was "Shh." Today, many libraries look very different. On a weekday afternoon in a medium-sized town, you might find a group of retired people learning to make video calls, a teenager recording music in a small soundproof room, and a parent and toddler＊ singing songs on a colourful carpet. (1)Some people complain that libraries have lost their way, but others argue that they are simply returning to a role they have always played in a different form.

To understand this argument, it helps to think about what sociologists call "third places." The first place is the home, and the second is the workplace or school. Third places are everything else: cafés, barbershops, parks and other spots where people can spend time without being family members or colleagues. What makes a good third place is not its appearance but its atmosphere. (2)It should be easy to enter, cost little or nothing, and allow people from different backgrounds to meet as equals. In many towns, traditional third places have been disappearing. Small cafés are replaced by chains where customers are encouraged to leave quickly, and shopping centres are designed for spending rather than staying.

The library is among the few remaining places that meet all of these conditions. Nobody has to buy anything to sit there, and nobody asks visitors to prove that they belong. A student without a quiet room at home, a worker who has lost a job and needs to look for a new one online, and a lonely elderly man who simply wants to read the newspaper among other people can all use the same space. (3)In this sense, the change in libraries is less a betrayal of their purpose than an honest response to what communities now need. Books are still central, but the library's deeper purpose has always been to give everyone equal access to knowledge and to one another.

Of course, the new role brings real difficulties. Librarians who trained to organise collections now find themselves helping people fill in government forms, calming arguments and running workshops. Some readers who come for silence are annoyed by children's laughter or the hum of a 3D printer. (4)Many libraries have dealt with this by dividing their buildings into zones, so that noisy activities happen on one floor while another remains completely quiet, and by planning their calendars so that lively events do not clash with exam seasons. Such solutions are not perfect, but they show that the old and new roles can exist side by side.

There is also the question of money. Libraries are usually paid for by local taxes, and when budgets are cut, they are often among the first services to suffer. Critics ask why public money should support a place for chatting when anyone can download a book onto a phone. (5)The answer, supporters say, is that a library's worth cannot be measured only by the number of books it lends. A place where a teenager finds a mentor*, or where an elderly woman finally talks to someone after a silent week, produces benefits that never appear in an annual report.

Perhaps the most helpful way to see the modern library is as a kind of living room for the whole town. (6)Like a good living room, it is somewhere people can do very different things side by side and still feel that they are together. Whether libraries survive the next fifty years may depend less on what happens to the printed book than on whether towns continue to value having such a room.

toddler　よちよち歩きの幼児
mentor　（信頼できる）助言者

設問 1　下線部(1)について，図書館の変化を批判する人と擁護する人は，それぞれどのように考えているか。60字以内で説明しなさい。

設問 2　下線部(2)を和訳しなさい。その際，It が指すものを明らかにすること。

設問 3　下線部(3)の意味を，段落③の具体例を一つ以上用いて説明しなさい。

設問 4　下線部(4)で述べられている二つの工夫を，それぞれ何のための工夫かがわかるように，90字以内でまとめなさい。

設問 5　下線部(5)を和訳しなさい。

設問 6　下線部(6)について，筆者は図書館を何にたとえ，両者にはどのような共通点があると述べているか。日本語で説明しなさい。

2　短い英文の読解（配点 60点）

次の A〜C の英文を読んで，それぞれの設問に答えなさい。

A

英文中の空欄 ① 〜 ⑤ にあてはまる語を，それぞれ (a)〜(d) の中から一つずつ選び，その記号を書きなさい。

Before the nineteenth century, most city streets after sunset were (①) and dangerous. People who had to go out at night often (②) a boy to walk ahead of them carrying a burning torch, and many simply stayed at home. The arrival of gas lamps (③) the way people used the evening. Shops could stay open later, theatres attracted larger audiences, and (④) began to feel safer walking home from work. In many towns, lamplighters walked the streets at dusk with long poles, lighting one lamp after another, and returned at dawn to put them out. For several generations they were a (⑤) sight, and children sometimes followed them from corner to corner. When electric lights arrived, the job slowly disappeared, but the change it had begun continued: the night had become time that ordinary people could use.

設問 A A の空欄 ① 〜 ⑤ に入れる語を選びなさい。

① (a) lively　(b) dark　(c) cheerful　(d) warm

② (a) hired　(b) borrowed　(c) fired　(d) refused

③ (a) prevented　(b) transformed　(c) ignored　(d) repeated

④ (a) machines　(b) walls　(c) residents　(d) stones

⑤ (a) tasteless　(b) frozen　(c) liquid　(d) familiar

B

英文中の下線部 ⑥ 〜 ⑩ に意味の近い語句を，それぞれ (a)〜(d) の中から一つずつ選び，その記号を書きなさい。

In late spring, a crowded colony of honeybees often divides. The old queen leaves the hive with thousands of workers, and the group hangs from a tree branch while it decides where to live next. A few hundred older bees act as scouts. They fly off in different directions to ⑥inspect possible homes, such as hollow trees or holes in walls, checking how big the space is, the width of the entrance and how dry it is. When a scout returns, it performs a dance across the cluster to show the direction and distance of the site it has found. A scout that has found an excellent site dances in a long and ⑧vigorous way, while one that has found a poor site dances only briefly. Other scouts are drawn to visit the best-advertised sites, and the support for weaker sites gradually fades. ⑦Eventually enough scouts gather at one location to form a kind of ⑨consensus.

The whole swarm then takes off, and within minutes the bees ⑩abandon the branch and fly together to their new home.

設問 B　B の下線部 ⑥ 〜 ⑩ に意味の近い語句を選びなさい。

⑥ inspect
(a) avoid　(b) build　(c) examine　(d) decorate

⑦ Eventually
(a) Finally　(b) Suddenly　(c) Rarely　(d) Immediately

⑧ vigorous
(a) lazy　(b) secret　(c) careful　(d) energetic

⑨ consensus
(a) argument　(b) distance　(c) agreement　(d) mistake

⑩ abandon
(a) protect　(b) enlarge　(c) clean　(d) leave

C

⑪ 〜 ⑮ の英文が本文の内容と合うように，空欄にあてはまるものを (a)〜(d) の中から一つずつ選び，その記号を書きなさい。

When Dana Whitlock became the head of a small design team, she found that her weekly meetings were dull. People sat around a table staring at their laptops, the same two voices did nearly all the talking, and the meetings rarely ended with a clear decision. One sunny morning she suggested that the team should talk while walking around the park next to the office instead. The experiment went so well that walking meetings soon became a regular part of the week.

Whitlock now follows a few simple rules. No more than three people take part, because a larger group cannot hear one another on a narrow path. The route is fixed and takes about twenty minutes, so nobody worries about getting lost or being late. Shortly after the group returns, one person records the decisions in a short voice memo and sends it to everyone.

Team members say they speak more openly when they walk side by side than when they sit facing one another, perhaps since nobody has to meet anyone else’s eyes. Several also say that ideas come more easily when they are moving. However, Whitlock admits that walking meetings are not suitable for everything. When the team needs to examine detailed slides or drawings together, a room with a large screen is still the better choice.

設問ＣＣの英文 ⑪ ～ ⑮ の空欄にあてはまるものを選びなさい。

⑪ Whitlock first suggested walking meetings because her meetings ( ).
(a) were too expensive
(b) felt boring and seldom led to decisions
(c) were already held outdoors
(d) had too many visitors from outside

⑫ Walking meetings have no more than three people because ( ).
(a) a larger group cannot hear one another on a narrow path
(b) the park is closed to large groups
(c) the team has only three members
(d) the route takes only five minutes

⑬ The decisions made during a walk are ( ).
(a) written on a whiteboard in the park
(b) kept secret from other team members
(c) recorded in a voice memo soon after the walk
(d) decided later by a vote of the whole company

⑭ Team members feel they can speak more openly when walking, perhaps because they ( ).
(a) are far away from their manager
(b) do not have to look each other in the eye
(c) are paid extra for walking meetings
(d) cannot be heard by anyone else

⑮ According to Whitlock, a meeting room is still better when the team ( ).
(a) wants to get some exercise
(b) has only two people
(c) is talking about a simple topic
(d) needs to study detailed slides or drawings together

3　英作文（表の読み取り）（配点 60点）

下の指示を読み，英語で答えなさい。

設問 1　表と英文の指示を読んで書きなさい。

The table below shows the results of a survey of 400 students at a fictional high school about how they travel to school.

First, describe the main points of the table. Then, give your opinion on what the school could do to encourage more students to walk or cycle.

Write about 120 to 150 English words.

How students travel to Fernbrook High School (fictional data, 400 students)

Way of travelling	Students living within 3 km	Students living more than 3 km away	Total
Walk	96	4	100
Bicycle	58	30	88
Bus or train	22	118	140
Driven by family	34	38	72

（Fernbrook High School は架空の学校であり，数値も架空である）
