予 想 問 題　第 1 回

全 学 統 一 方 式 （ 文 系 ） 対 策

英 語 問 題

立命館大学 全学統一方式（文系）の出題形式に準拠 ／ 問題

注　意

1. 問題部分とマーク式の解答用紙で構成されている（問題部分 1〜11ページ・解答用紙 12ページ）。
2. 試験時間の目安は80分。大問は I〜V の5題で，すべて選択式である。
3. 答えは，解答用紙の該当する番号の円を塗りつぶす（〇で囲むだけでもよい）。
4. 配点は I 26点・II 34点・III 24点・IV 16点・V 20点（計120点）。本予想問題が独自に定めた配点である。
5. 本冊子の英文・設問はすべてオリジナルである。登場する人物・団体・場所は架空である。

立命館大学の過去問・公式問題ではありません。予想問題であり，大学とは関係がありません。
本冊子は過去の出題形式を分析して作成した練習用の教材です。

I 長文読解（配点 26点）

以下の英文を読み，後の問いに答えよ。

On a gray morning in early spring, Ingrid Solberg stands in a drafty shed at the edge of Kvalvik, a fishing village on Norway's western coast, running her hand along the curved ribs of an unfinished boat, whose wood is still pale and smells of resin[1]. Around her, four teenagers are measuring planks, honing chisels[2], and bickering cheerfully about whether the next board should be steamed for another ten minutes. "They argue about it the way my grandfather argued with his brothers," Solberg says, smiling, "and that's how I know they're learning."

Solberg, now sixty-three, was raised in a house where boats were part of daily conversation. Her father and uncles built small wooden fishing boats in the traditional clinker[3] style, in which overlapping planks are fastened together with copper rivets. As a girl, she spent long afternoons sweeping wood shavings from the workshop floor and handing tools to the men, who rarely explained what they were doing. "You were expected to watch," she recalls. "Nobody wrote anything down; the knowledge lived in their hands."

By the time she was a teenager, that knowledge seemed to have no future. Fiberglass[4] boats, which were cheaper to produce and easier to maintain, had begun to replace wooden ones all along the coast, and one by one, the local boatyards closed. Solberg's father sold his tools when she was seventeen, and she left the village to study mechanical engineering in the city. For almost thirty years she designed parts for offshore oil platforms, a career that took her to Scotland, Brazil, and Singapore, and she thought little about the boats of her childhood.

What brought her back was a funeral: when her last surviving uncle died in 2011, she returned to Kvalvik and found his old boat lying upside down behind the house, its planks warped and its paint peeling. Neighbors told her it would cost more to repair than to replace. Instead of agreeing, she spent the following summer restoring it herself, relying on memory, a few faded photographs, and a great deal of painstaking trial and error. "I made every mistake you can imagine," she says. "But somewhere in the middle of it, I realized I remembered far more than I thought I did."

The restored boat attracted attention; retired fishermen stopped by to offer advice, and a few younger residents asked whether she could teach them. In 2014 Solberg left her engineering job and, with the help of a small grant from the regional government, turned her uncle's former shed into a teaching workshop. Each year she accepts a handful of apprentices, most between fifteen and twenty-five, who spend two years learning to build a complete boat from raw timber.

Her teaching style differs sharply from the way she herself was taught. Unlike the silent men of her childhood, Solberg explains everything, and she insists that her students record each

stage of the work in notebooks and on video. She also draws on her engineering background, using computer models to show how the shape of a hull[5] affects its stability in rough water. Some veteran boatbuilders were skeptical at first, arguing that a craft learned from screens and notes would lose its character, but Solberg disagrees. “The tradition survived for centuries because people adapted it,” she says. “If we refuse to change anything, we will simply preserve it in a museum.”

Not every student stays with the craft: of the thirty-one apprentices who have completed the program, only nine now work with wooden boats full time. Others have become carpenters, furniture makers, or engineers, and two have gone into marine biology. Solberg does not regard this as a failure. “What they take with them is patience, and respect for materials,” she says. “You cannot hurry a piece of oak, because if you try, it splits.”

The workshop has also changed the village. Visitors now come to Kvalvik in summer to watch the boats being built, and a small festival held each August, at which finished boats are launched[6] into the harbor, draws several thousand people. Local cafes and guesthouses report that the festival weekend has become the busiest of their year. Several families who had considered moving to the city have stayed, partly, they say, because their children found something meaningful to do at home.

Still, the future is far from certain, since suitable timber is increasingly difficult to obtain because the slow-growing oak and pine that boatbuilders prefer are in short supply, and the grant that supports the workshop must be renewed every three years. Solberg spends much of her winter writing applications and searching for sawmills[7] willing to set aside the right logs. She has also begun compiling a detailed manual, illustrated with her students’ drawings, so that the knowledge will not depend on any single person again.

Back in the shed, one of the apprentices, a quiet nineteen-year-old named Henrik Aasen, holds up a plank for her inspection. Solberg runs her thumb along its edge, nods, and hands it back. “Good,” she says, “now do the next one exactly the same.” Asked whether she ever regrets leaving her well-paid engineering career, she laughs. “I spent thirty years building things I never saw used,” she says. “Here, I watch a boat go into the water every summer, and the people who built it are standing right next to me.”

1. resin　樹脂（やに）
2. chisel　のみ（木を削る工具）
3. clinker　（船体の板を少しずつ重ねて張る）よろい張りの
4. fiberglass　ガラス繊維強化プラスチック
5. hull　船体
6. launch　（船を）進水させる
7. sawmill　製材所

〔1〕 次の問い(A)～(D)に対する答えとして最もふさわしいものを，本文の内容に基づいて(1)～(4)のうちから1つずつ選びなさい。

(A) What was Solberg's experience of learning as a child?

(1) She learned mainly by observing adults who seldom explained their work.
(2) She attended a school that specialized in teaching boatbuilding.
(3) She studied written instructions left by her grandfather.
(4) She was not allowed by her family to enter the workshop.

(B) What happened when Solberg restored her uncle's boat?

(1) She sold the boat to a museum after repairing it.
(2) Her neighbors paid for most of the repairs.
(3) She discovered that the boat could never be used again.
(4) She found that she remembered more about boatbuilding than she had expected.

(C) How does Solberg's way of teaching differ from the way she was taught?

(1) She lets students work in silence and learn only by watching.
(2) She avoids using any modern technology in her lessons.
(3) She explains her methods and asks students to document their work.
(4) She accepts only students who promise to build boats professionally.

(D) According to the article, what is one problem the workshop faces?

(1) Few young people are interested in becoming apprentices.
(2) Obtaining suitable timber has become harder.
(3) Visitors to the village have complained about the noise.
(4) The regional government has ended its financial support.

〔2〕 次の(1)〜(5)の英文について，本文の内容に合うものは 1，合わないものは 2，本文からは合うとも合わないとも決められないものは 3 を選びなさい。

(1) Before returning to Kvalvik, Solberg worked as an engineer in several countries.

(2) Most of the apprentices who have finished the program now build wooden boats for a living.

(3) Henrik Aasen plans to open his own boatyard after completing the program.

(4) The August festival has brought economic benefits to local businesses.

(5) Solberg believes the tradition will survive only if its methods are kept exactly as they were.

〔3〕 本文全体の内容を表す題として最もふさわしいものを(1)〜(5)のうちから1つ選びなさい。

(1) Why fiberglass boats replaced wooden ones in Norway
(2) An engineer's career on offshore oil platforms
(3) Keeping a coastal craft alive by changing how it is passed on
(4) How a summer festival saved a fishing village
(5) The decline of fishing in western Norway

II 長文読解（配点 34点）

以下の英文を読み，後の問いに答えよ。

When I took the job of running the public library in a small town three years ago, a friend asked me, only half joking, whether I was really planning to spend my career as the custodian of a building that would soon be deserted. It was a fair question; I did not tell him so, but [A] I shared his doubts. Almost any book can now be downloaded in seconds, and most questions once brought to a reference desk can be answered by a phone. I assumed that my main task would be to manage a slow and dignified decline: dwindling visitors, shrinking budgets, and long rows of shelves holding books that nobody borrowed.

The first surprise came within a week. On a Tuesday morning, before the doors had even opened, a line had formed outside, and it was not composed of eager readers clamoring for the latest novels. There was an elderly man who came to read the newspapers because he could no longer afford a subscription, a young mother looking for somewhere warm to take her baby, two students who needed a quiet place to study and a reliable internet connection, and a woman who needed help with an online application for a government benefit. [B] of them asked me about a book.

Over the following months I learned that this was typical rather than exceptional. (あ)The library had quietly become something its founders could hardly have imagined: not mainly a storehouse of books, but one of the very few indoor places in town where anyone could stay for as long as they liked without being expected to buy anything. A cafe politely expects you to order a coffee, and a shopping mall presumes that you have come to spend money; the library asks for nothing at all. [C], it treats a person who stays all day with a single newspaper in exactly the same way as one who borrows ten books.

This role is easy to overlook because it produces nothing that can be conveniently quantified. Libraries have traditionally measured success by the number of books they lend, and by that standard many are indeed in trouble. But a person who spends an afternoon reading a magazine, asking for directions, or simply sitting out of the rain does not appear anywhere in those figures. When the town council reviewed our budget in my first year, I was asked to justify our existence with statistics, and I realized with some dismay that [D] of what we did best left no trace in them. So I began keeping a ledger at the front desk and jotted down every question I was asked during a single month. When the month was over, I had tallied more than six hundred entries, ranging from how to attach a photograph to an email to whether a particular mushroom was edible.

The ledger changed the tone of my conversations with the council. Rather than presenting the library as an obsolete collection of books that fewer and fewer people wanted, I could portray it as a versatile service that responded to whatever residents happened to need on a given day. (い)That argument did not save every part of our budget, but it saved the part that mattered most, which was the staff. [E], the most valuable thing a library offers is not its shelves but the people who know how to find things and who are willing to help anyone who asks, however trivial, peculiar, or embarrassing the question may be.

None of this means that books have become unimportant. On the contrary, I have been struck by how many people still crave them, especially children, whose Saturday reading sessions are packed every week. [F], the way people use books has changed. Many visitors browse the shelves not because they cannot find information elsewhere, but because they enjoy (う)the pleasure of stumbling on something they were not looking for. A search engine gives you precisely what you ask for, whereas a shelf of books offers you its neighbors. I have watched a boy arrive in search of dinosaurs and leave clutching a book on volcanoes, and an elderly woman seeking a cookbook go home delighted with a history of the spice trade.

There are, of course, genuine difficulties. Because the library is open to everyone, it must sometimes deal with people who are unwell, lonely, or deeply troubled, and my staff are librarians, not trained social workers. On some evenings we spend more time defusing quarrels than recommending novels. [G], I have gradually come to believe that this openness is precisely the library's greatest strength. (え)A place that turns no one away will inevitably meet problems that more selective places can avoid; the alternative is a town in which the people who most need somewhere to go have nowhere at all.

When my friend visits now, he no longer asks whether the building will soon be deserted. Last month he came on a rainy Saturday and could not find a single free seat. "So this is [H] you meant," he said, looking around at the children on the carpet, the students hunched over the long tables, and the man by the window who comes daily to read the newspapers. I told him that I had not meant anything in particular; I had only been paying attention. (お)The library had been telling me what it was for all along. I simply had to stop assuming that I already knew.

〔1〕 本文の空所(A)～(H)に入れるのに最もふさわしいものを，それぞれ(1)～(4)のうちから1つずつ選びなさい。

(A)

(1) privately　(2) publicly　(3) on the contrary　(4) for example

(B)

(1) Most　(2) All　(3) Each　(4) None

(C)

(1) Even so (2) Instead (3) What is more (4) Otherwise

(D)

(1) none (2) much (3) little (4) few

(E)

(1) By contrast (2) By mistake
(3) In the past (4) In my experience

(F)

(1) Even so (2) Therefore (3) Similarly (4) In short

(G)

(1) Accordingly (2) In addition (3) Nevertheless (4) For one thing

(H)

(1) which (2) what (3) that (4) how

〔2〕 下線部(あ)〜(お)が本文中で表している意味・内容として最もふさわしいものを，それぞれ(1)〜(4)のうちから1つずつ選びなさい。

(あ) The library had quietly become something its founders could hardly have imagined

(1) a free public space where people can stay without spending money
(2) a shop that sells coffee as well as books
(3) a museum where old books are displayed but not lent
(4) a place used mainly by students preparing for exams

(い) That argument did not save every part of our budget

(1) The council refused to give the library any money.
(2) The library received more money than before.
(3) Some funding was cut, although the staff were kept.
(4) The staff had to be reduced, but the books were kept.

(う) the pleasure of stumbling on something they were not looking for

(1) searching for information carefully on a computer
(2) finding interesting books by chance
(3) reading the same favorite book many times
(4) choosing books recommended by the staff

(え) A place that turns no one away will inevitably meet problems that more selective places can avoid

(1) The library should refuse entry to people who cause trouble.
(2) Selective places usually have more problems than libraries do.
(3) Problems at the library can be avoided by training staff as social workers.
(4) Because the library welcomes everyone, it cannot escape some difficult situations.

(お) The library had been telling me what it was for all along

(1) The founders had recorded what the library was meant to do.

(2) The way people actually used the library had shown its real purpose.

(3) The author had always known exactly what the library was for.

(4) The author's friend had explained the library's role to her.

III 会話文（配点 24点）

〔1〕 次の会話の空所(あ)〜(え)に入れるのに最もふさわしい表現を(1)〜(10)のうちから1つずつ選びなさい。同じ表現を2度使ってはならない。また，使わない表現が6つある。

At a bicycle repair shop

A: Hi. My bike started making a strange clicking noise this morning, and now the gears keep slipping. (あ)

B: Let me have a look. Hmm, the chain is quite worn, and the back wheel is slightly bent. When did you last have it serviced?

A: To be honest, never. I bought it secondhand about two years ago.

B: (い) Most people forget that bikes need regular checks, just like cars.

A: So how much will it cost to fix everything?

B: A new chain and straightening the wheel would come to about eighty dollars. (う)

A: That's more than I expected. I ride it to work every day, though, so I suppose I don't have a choice. How long will it take?

B: We're quite busy this week, so it might not be ready until Thursday.

A: Thursday? (え)

B: Well, we do have a couple of bikes you could rent in the meantime. It's ten dollars a day.

A: That would help a lot. I'll take one.

(1) I can lend you my car.
(2) That explains a lot.
(3) It's brand new, actually.
(4) How am I supposed to get to work until then?
(5) That includes the labor.
(6) You can pick it up in an hour.
(7) Could you take a look at it?
(8) We don't repair that kind of bike.
(9) I've never ridden a bike before.
(10) That's cheaper than I thought.

〔2〕 次の会話の空所(か)〜(け)に入れるのに最もふさわしい表現を(1)〜(10)のうちから1つずつ選びなさい。同じ表現を2度使ってはならない。また，使わない表現が6つある。

Two classmates preparing a presentation

A: Have you finished the slides for Friday's presentation?

B: Almost. I've done the introduction and the part about the survey results. (か)

A: I was going to, but I'm still waiting for the last few responses to the questionnaire.

B: Really? The deadline for responses was last Monday.

A: I know. (き) I didn't want to leave anyone out.

B: That's kind of you, but we can't wait forever. Our professor said she wants to see a draft on Wednesday.

A: Okay, you're right. (く)

B: Good. And remember, we each need to speak for about five minutes.

A: Five? I thought it was ten.

B: (け) She changed it because we have an unusually large number of groups this year.

A: Oh, I must have missed that announcement. I'll have to cut some of my part, then.

(1) I'm afraid I can't come on Friday.
(2) It was, at first.
(3) Have you written the conclusion yet?
(4) Nobody answered the questionnaire.
(5) That's what I said.
(6) But a few people asked for more time.
(7) It's fifteen minutes, actually.
(8) I've already sent it to her.
(9) I'll finish it with what we have by tomorrow night.
(10) Let's ask for more responses, then.

IV　文法・語法（配点 16点）

〔　〕 次の(A)～(H)の英文の空所に入れるのに最もふさわしいものを，それぞれ(1)～(4)のうちから1つずつ選びなさい。

(A) If it _____ for your advice, I would have made a terrible mistake.
(1) were not　(2) had not been　(3) has not been　(4) would not be

(B) She is used to _____ up early, so the 6 a.m. meeting did not bother her.
(1) get　(2) got　(3) getting　(4) have got

(C) This is the town _____ my grandmother was born.
(1) which　(2) what　(3) whose　(4) where

(D) No sooner _____ the station than the train left.
(1) had I reached　(2) I had reached　(3) I have reached　(4) have I reached

(E) The more you practice, _____ you will become.
(1) better　(2) the best　(3) the better　(4) best

(F) I'd rather you _____ tell anyone about this yet.
(1) didn't　(2) don't　(3) won't　(4) not

(G) Neither the manager nor her assistants _____ aware of the problem.
(1) was　(2) were　(3) has been　(4) is

(H) There is no point _____ about something you cannot change.
(1) to worry　(2) worried　(3) worry　(4) worrying

V 語彙（配点 20点）

〔1〕 次の(A)〜(E)の英文の空所に入れる語として最もふさわしいものを，それぞれ(1)〜(4)のうちから1つずつ選びなさい。

(A) The hotel staff carried our _____ up to the room.
(1) lumber (2) luggage (3) lottery (4) ladder

(B) The baby was asleep, so we spoke in a _____.
(1) whisper (2) wrinkle (3) wreck (4) wrist

(C) After the long hike, my legs were so _____ that I could hardly climb the stairs.
(1) loose (2) bold (3) tame (4) sore

(D) The doctor told him to _____ from eating sweets for a month.
(1) resign (2) reckon (3) refrain (4) recite

(E) She answered the difficult question _____, without any hesitation.
(1) faintly (2) vaguely (3) gloomily (4) confidently

〔2〕 次の(A)〜(E)の英文の下線部の語に意味が最も近いものを，それぞれ(1)〜(4)のうちから1つずつ選びなさい。

(A) The new evidence reinforced her argument.
(1) weakened (2) replaced (3) strengthened (4) delayed

(B) She wrote a concise summary of the meeting.
(1) detailed (2) short (3) careless (4) formal

(C) The company had to postpone the event because of the storm.
(1) delay (2) cancel (3) advertise (4) organize

(D) The village is renowned for its pottery.
(1) criticized (2) punished (3) unknown (4) famous

(E) We need to assess the damage before we start repairs.
(1) repair (2) evaluate (3) ignore (4) cause

解答用紙（マーク式）　予想問題 第1回

受験番号・氏名欄は省略。選んだ番号の円を塗りつぶすか○で囲む。Ⅰ〔2〕は 1・2・3 のいずれか。

Ⅰ〔1〕

(A)	① ② ③ ④
